# Coolfire Core

Digitizing and automating your manual work. Coolfire Core simplifies managing tasks, communication, and workflows for fast-moving teams.
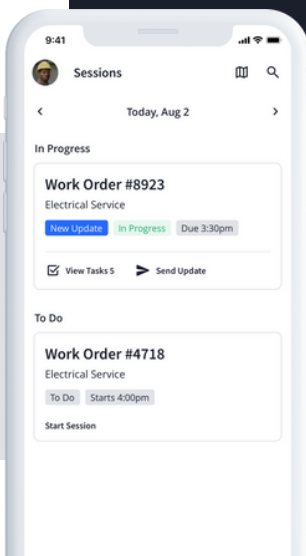

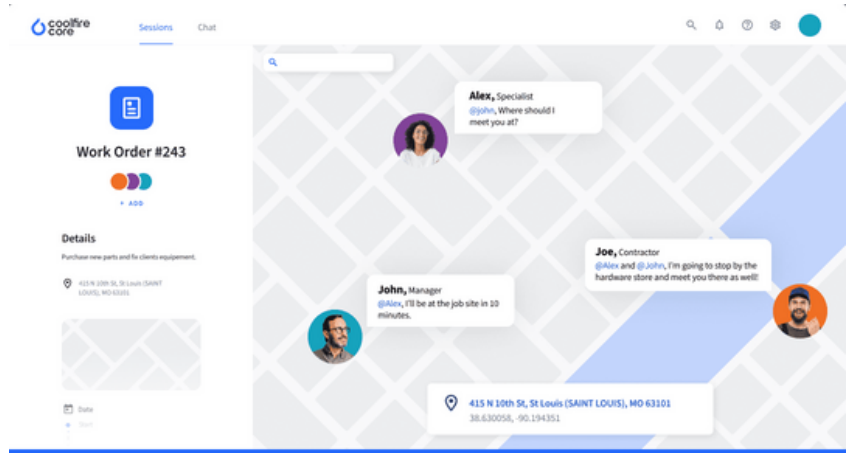

## Helping teams make better, faster decisions.

Coolfire Core connects teams to the things they need to keep working and moving forward.

- ✓ Centralized place for all task lists, workflows, schedules and communications.

- ✓ Define and enforce standard operating procedures for consistent quality

- ✓ Capture and share job progress to ensure the job gets done right and on time.

- ✓ Extending existing systems to get your team the data they need–wherever and whenever they need it.

## Defeat operational chaos.

By simplifying how you manage tasks, communication, and workflows, you can better coordinate the flow of work inside and outside your organization. Coolfire Core organizes your operations to help you understand what's done, what's at risk, and what needs your attention right now. Get your team working better together with Coolfire Core.

### Fast to deploy

Quickly get your team the tools they need. No complex setup or customization is required. Most teams launch their first jobs in as little as one week.

### Flexible

Adjustable software to support you the way you naturally work. Support multiple use cases across your operations with a single tool.

### Extend & enhance

Don't replace existing IT systems. Enhance your systems and extend your data to people where and when they need it.

- ✓ Supports SMB, mid-size, and enterprise business operations
- ✓ Configurable to meet your unique business needs

## coolfire

COOLFIRESOLUTIONS.COM

### Operation teams that deliver right. On-time.

Confidently scale up operations, knowing every job gets done the right way. Inspect quality and guarantee customers satisfaction with frictionless data collection.

### Make standard operating procedures the standard

Enforce tasks and workflow when it's required and give your team flexibility when it's not. Track work progress and store it for future reference.

### Automate manual processes

Stop wasting time on repetitive tasks—automate processes from HQ to the field and back. Build an operating system that keeps your teams moving forward and working on the most critical tasks.

### Control the bottom line

Seeing task lists, workflows, schedules, and communication in the same place helps you catch errors before they happen and proactively lead your team.
