

Coolfire Solutions' Ronin Platform to Aid New U.S. Security Efforts

Delivery Platform Will Improve Situation Awareness for Central Asian Operations

ST. LOUIS, MO – (Dec. 5, 2017) Coolfire Solutions has been selected as part of a multi-million dollar contract to deliver its Ronin Platform to a Central Asian customer in support of United States Department of Defense policies. This contract supports missions in border security, combatting terrorist threats and disrupting the narcotics trade.

The Ronin Platform is a lightweight system that integrates real-time data from IoT and sensors into an application engine capable of creating situational awareness for the individual and providing a common operational picture for teams. Ronin is capable of working in some of the toughest conditions imaginable with any network including both tactical and commercial radio systems.

“Ronin provides reliable, cost-effective situational awareness to demanding military and security customers,” said Coolfire Solutions Chief Executive Officer Don Sharp. “Coolfire understands the U.S. Government’s challenging economic climate, and we are pleased to have been selected to supply these critical, highly reliable systems to support efforts in these regions.”

ABOUT COOLFIRE SOLUTIONS

Coolfire Solutions is the creator of the Ronin Platform, a real-time situational awareness delivery platform, built to integrate data from any source and transform it into actionable intelligence. Ronin was originally developed for the U.S. Military, but is now being widely adopted by industry leaders to minimize system gaps and improve operational efficiency.
